

# Analysis of Top Players and their wages

-Jahaan Nadkarni

## Introduction to FIFA19 Players

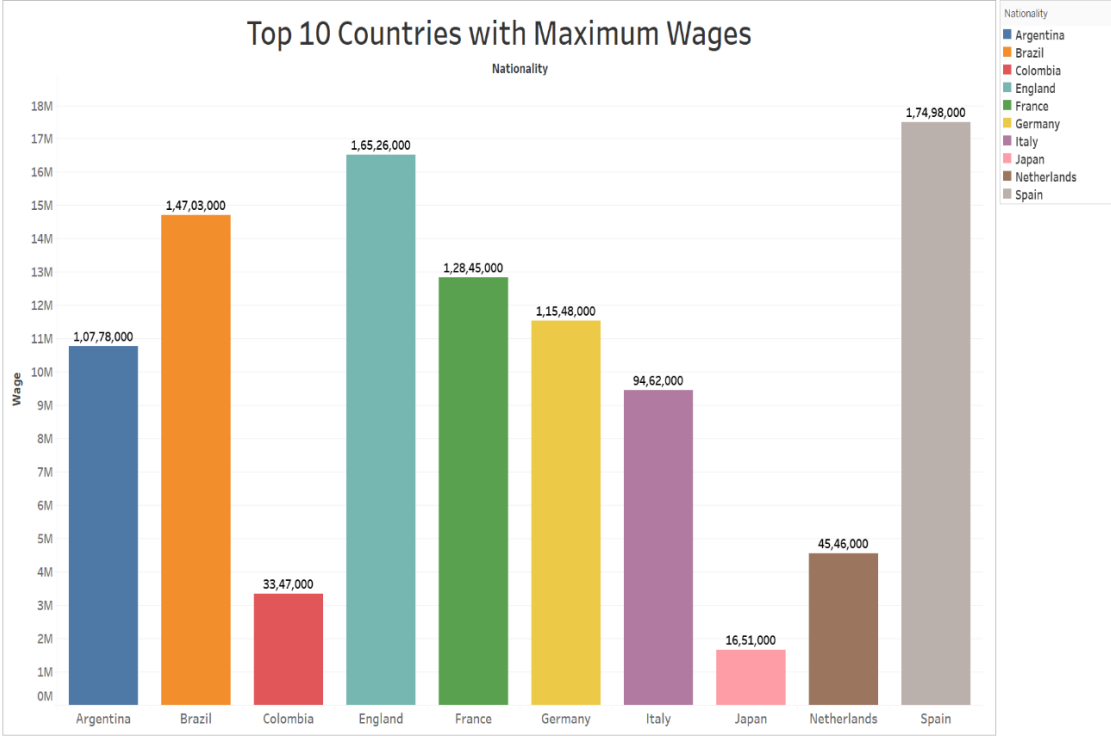

The above graph shows the Number of the Players from different countries. England having the highest players. Nationalities like European and South American Countries have majority players in FIFA 19.

The graph here shows the distribution of the ages with the number of players of that age. The area of the graph implying that the wider the area the more people are from that nationality.

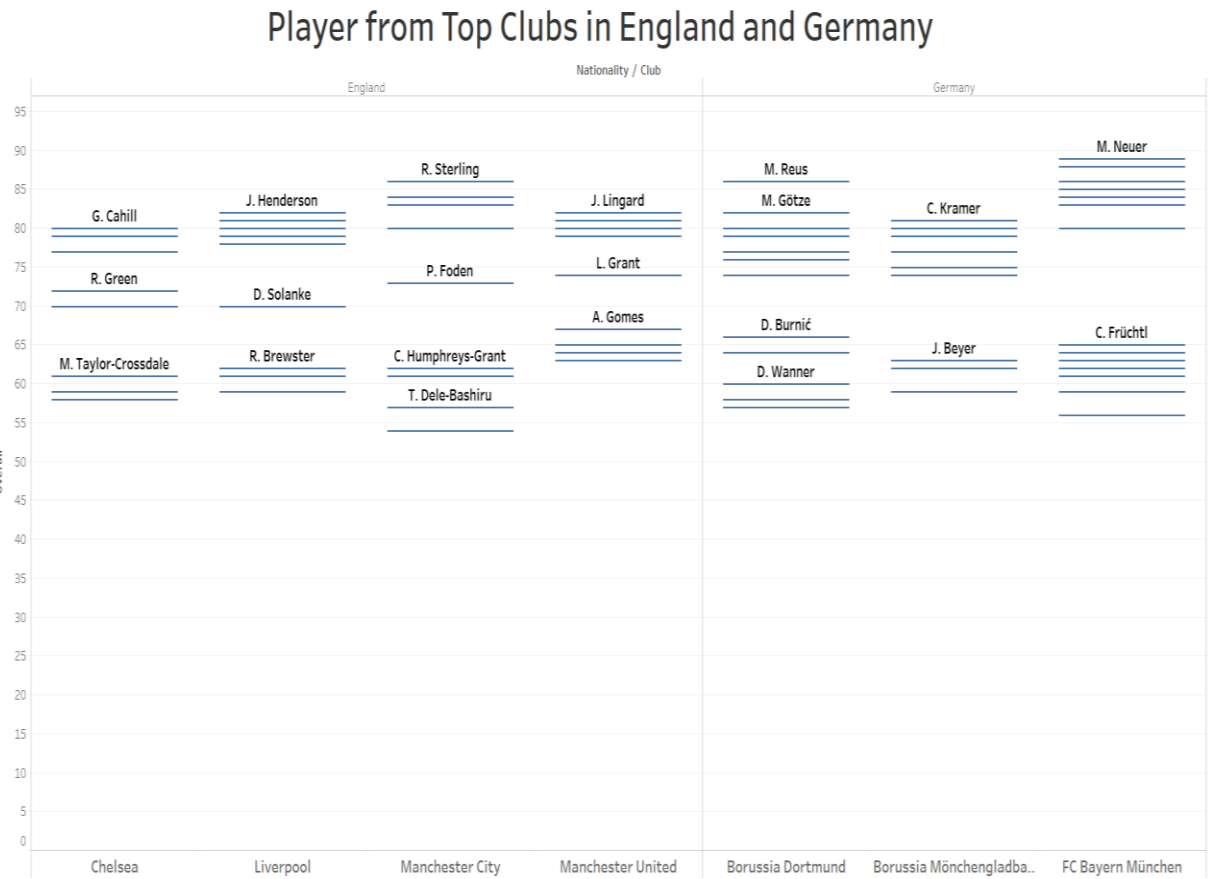

We see that **England** has the **highest** area which implies that the total count of **players** from that country is highest and **Netherlands** has the **lowest** area implying lowest **players out of the selected teams**.

## Zoom in to the Top 10 countries:

The Map here shows the Countries with the Highest Player Count and their Wages. Majority of the Total Wages to the players come from these European Countries and South American Countries.

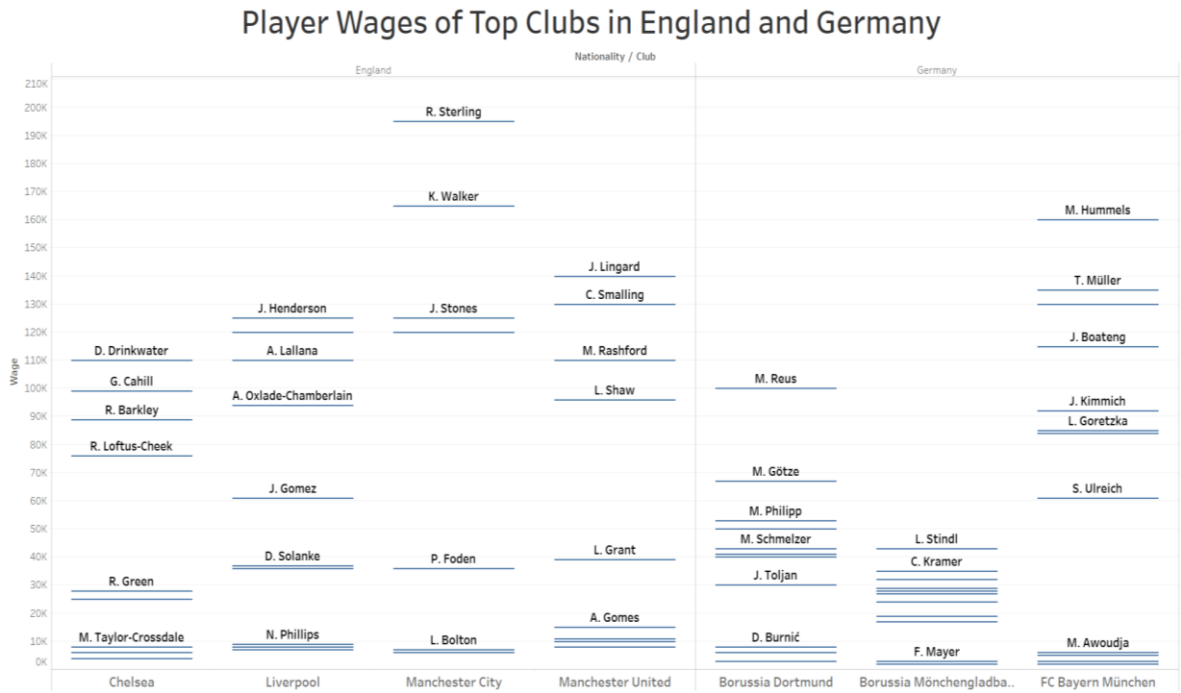

## Top Clubs in England and Germany

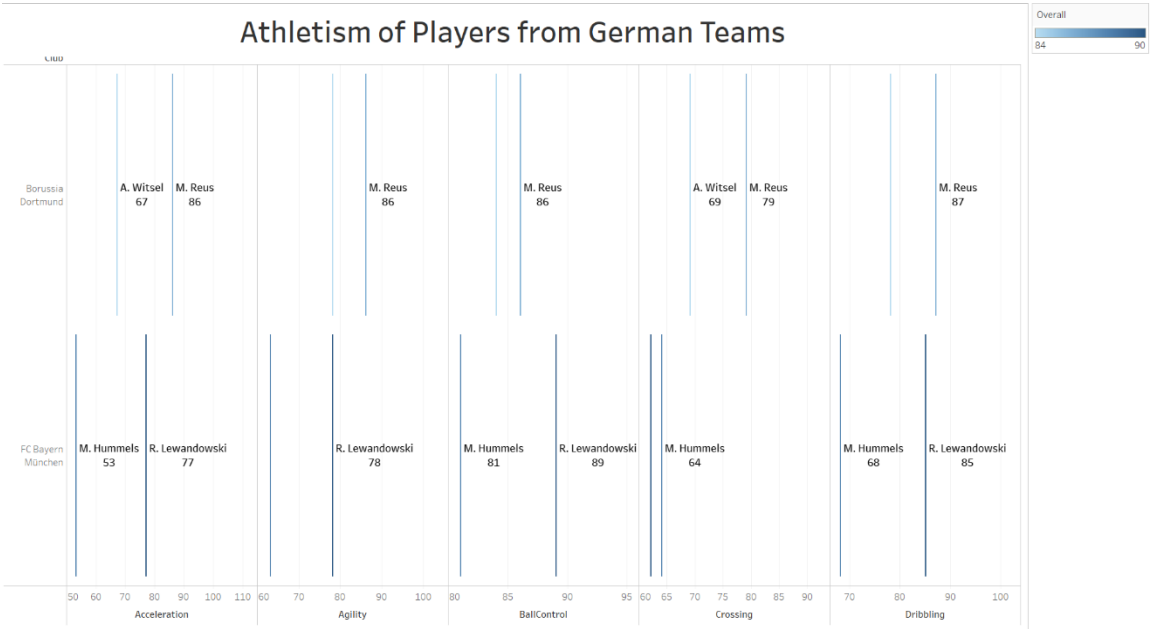

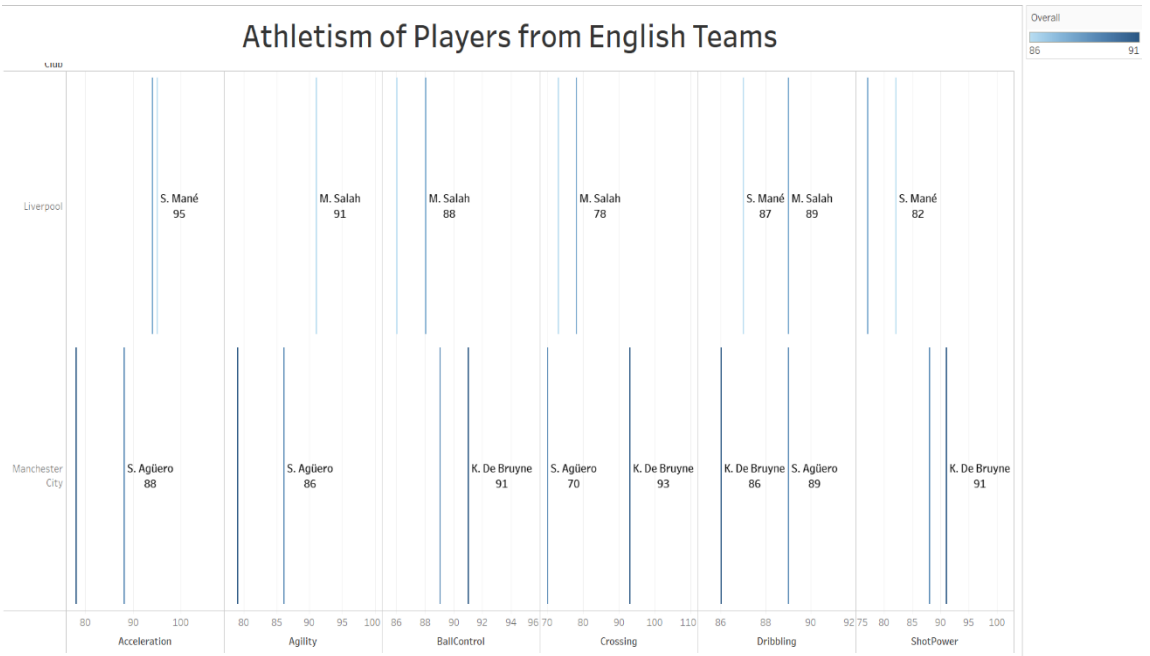

The Gantt Chart here shows the **Players** in these Top Teams. This **Graph** is Plot Against the **Overall Rating** to get a better idea whether it plays a role in Wages amongst Players.

Here we see that the Overall Rating of the Players is between 50 to 90. 90 is considered a very high Overall Rating.

Wages in FIFA 19

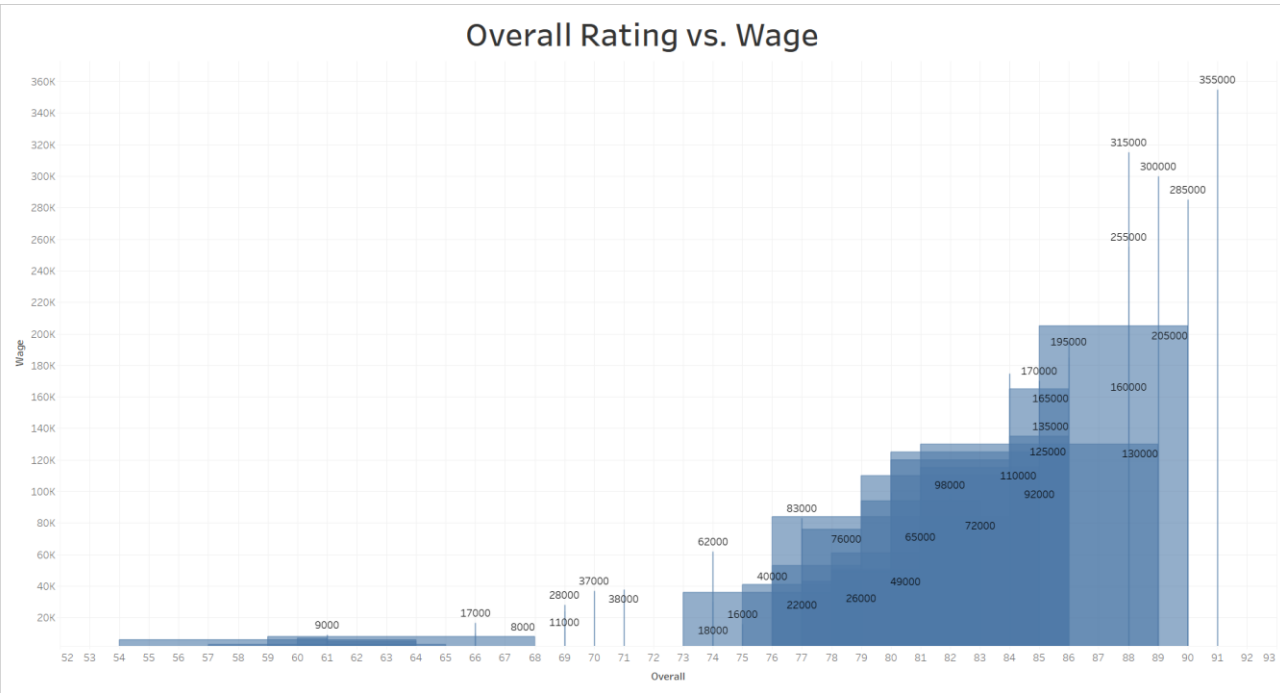

Zoom in to Team Players

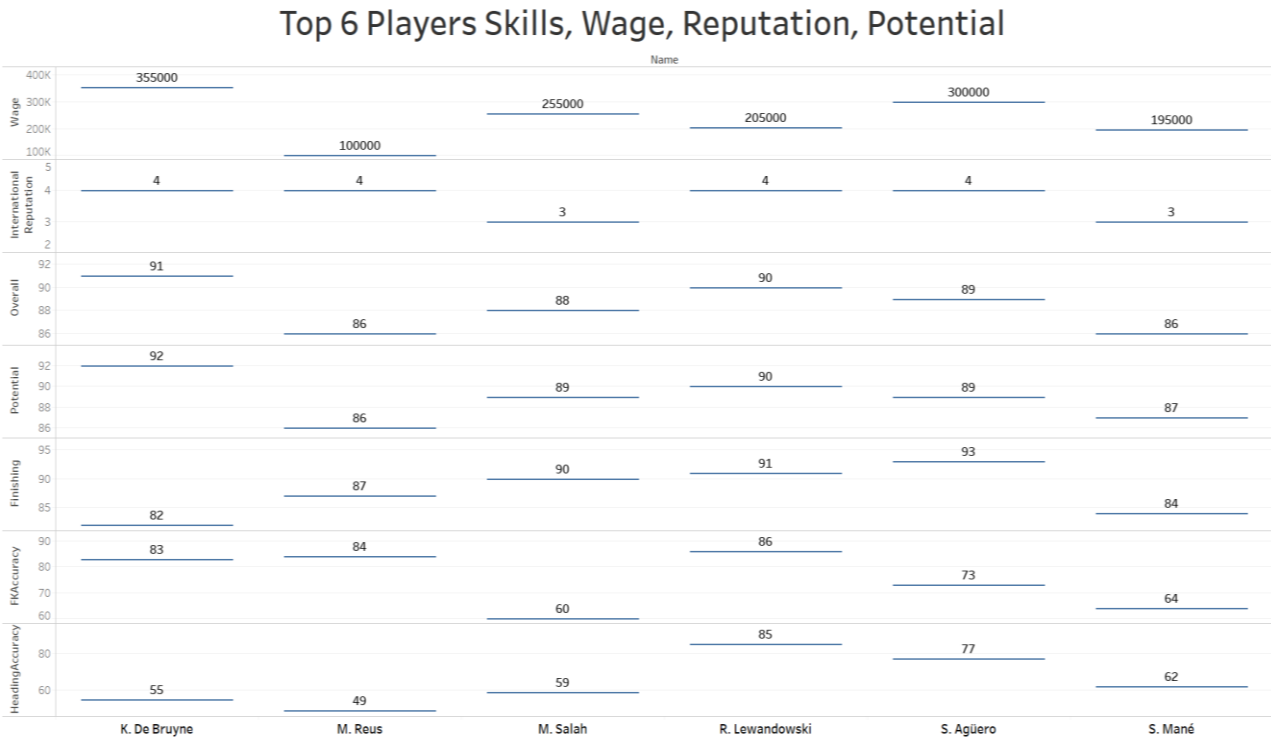

The Charts here talk about the Wages to the Players in FIFA19. On the Left, it shows Wages of Players from the Top Teams.

On the Right, the Chart shows that as the Overall Rating increases the Wages increases.

Zoom in to Top 6 Players

This Chart has Finishing Skills, Wage, Reputation and Potential of the Top 6 Players.

As we see in the above Overall Rating vs Wage, we see that Higher the Rating, Higher the Wage. Here in this Chart we see that all these Players have a high Wage and when compared to the Overall we see that the Overall Rating is also High.

Hence the Analysis concludes that the Higher the Overall Rating of the Player the Higher is the Wages given per Week.
